## REASONS FOR ALLOWANCE

### *Allowable Subject Matter*

1. Claims 1-24 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach, a method automatically controlling transmission power of a wireless communication apparatus in order to suppress consumed transmission power, the method comprising the steps setting the transmission power to a maximum value at a start of transmission; gradually reducing the transmission power by a predetermined amount, each time when transmission succeeds a predetermined number of times; and in the case of a transmission failure at a transmission power which is gradually reduced by the predetermined amount, determining a power which is higher by the predetermined amount than the transmission power, as an optimum value.

Chen et al. (5,960,361) in view of Agrawal et al. (5,722,051) disclosed a method of controlling power wherein consumed power is suppressed by setting the transmission power to a maximum value at a start of transmission, gradually reducing power by a predetermined amount each time when transmission succeeds a predetermined number of times, and in a case where a transmission failure occurs at a transmission power setting the power higher by a predetermined amount as the optimum power. Therefore, Chen in view of Agrawal disclose a similar invention, however, are failing to disclose setting the transmission power higher by the same amount it was lower in a previous step "the predetermined amount".

As a result claims 1-24 are deemed allowable.
